**About Quality factor:** The **Quality Factor (QF)** of an academic journal is to measure quality in that journal. It is commonly used as a representation for the significance of a journal within its field, with journals with higher Quality Factors considered to be more important than those with lower ones. The Quality Factor was planned by Professor Dr. Mohemmed Seraj Ansari (President of International Non-Olympic Committee) & Concept was taken from Q Factor originated with K.S. Johnson of Western Electric Company's Engineering Department. Quality Factor calculated yearly for those journals that are indexed in the *Journal Quality Factor Reports*.

**Quality factor Policy:** Quality Factor dedicated to Journals, by providing high performance quality factor results and continuously educating our system and practices.

- We provide superior quality services to clients with the following method.
- Provide free services and high quality results.
- Do it right every time.
- PDCA (Plan-Do-Check-Act) method will follow in our Quality Factor.
- Leverage collective knowledge and drive good collaboration among publication.

**Journal Selection Criteria:** Academic journal necessity to have ISSN number is the eligible criteria to get Quality Factor Measurement. Quality Factor is calculated using the below formula.

- Quality Factor =  $Q_1 + Q_2 + Q_3 + \dots + Q_n$

Audit Parameter	Grid
<i>ISSN or eISSN</i>	<b>0.10</b>
<i>Journal URL</i>	<b>0.10</b>
<i>Full Paper in Online</i>	<b>0.20</b>
